

Job Opportunity – Manager of Land

Company Description

North American Helium is a private exploration and production company focused on discovering new sources of helium to meet the increasing demands of the technology and space exploration sectors. The Company employs 20+ professionals in the Calgary office, 25 field staff across nine processing plants in SW Saskatchewan, and controls ~9 million acres of land in the province. The company also holds land in the USA and Alberta. NAH expects to drill 20-30 wells and build new processing facilities every year.

Helium is an emerging business in Canada providing a rewarding and challenging opportunity for the successful candidate.

Role Description

The Manager of Land will be responsible for overseeing all land activities related to mineral and surface lease acquisition supporting the Companies drilling, pipeline, and facilities activities. Efficient permit and lease management with the province of Saskatchewan is a critical job function. The successful candidate must be able to work collaboratively in a cross functional team including Engineering and Geoscience. You will also be expected to play a key role in stakeholder relations for the company supporting Operations and Engineering with royalty credit applications for facility building specifically with the Government of Saskatchewan, open houses for new facilities, community investment, and representation in high profile stakeholder groups. This is a full-time on-site role located in Calgary and reports directly to the President.

Qualifications

- Experience in both surface and mineral land acquisition, negotiations, and management.
- Knowledge of regulatory requirements and permitting processes - Saskatchewan specific.
- Strong project management and organizational skills.
- Flexible and able to manage competing priorities.
- Ability to work well independently and as part of a team. Organizational fit is critical.
- Working knowledge of Joint venture agreements.
- Minimum of 10 years of cross functional surface and mineral experience.

To apply for this unique opportunity, submit your resume in confidence to contact@nahelium.com. Applications submitted online (no phone calls please) will be accepted until a successful candidate is found. We would like to thank all applicants for their interest in this position, however only those selected will be contacted.

About North American Helium

Founded in 2013, North American Helium (NAH) is the leading company focused on exploration and production of helium from underground fields of inert nitrogen. The Company's mission is to grow its reliable and geopolitically secure non-hydrocarbon-based helium supply to replace declining supplies of helium in North America that currently come from legacy hydrocarbon projects and a diminishing Cold War-era stockpile.
